

Project newsletter Issue #2

**APRIL 2023** 

#### Dear reader,

You have just received the 2nd newsletter of the LMI-EUniv project, a 26 months ERASMUS+ Strategic Partnership, that brings together 5 partners from five EU countries to understand how European Universities are using labour market information and labour market intelligence in the planning and delivery of their training offer and how can this be improved.

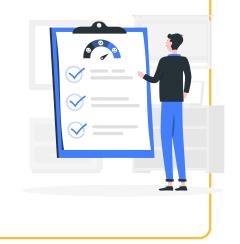

Best wishes, LMI-EUniv project team

#### LMI-EUniv survey

The LMI-EUniv team has launched a large European survey to find out how Universities in Europe are using Labour Market Intelligence (LMI).

Understanding how Universities are using LMI is critical to develop the best strategis for matching the education/courses and extra-curricular elements to the needs of the local and regional area.

With effective LMI, universities will be better able to innovate around core themes such as demand driven internal strategic planning; targeted business and public facing activities; increased outreach and widening participation; efficient Careers Advice to potential and current learners, and an ability to express their value to the community and local area in newer, more profound ways.

## Meeting in Bilbao

The LMI-EUniv team at work. The second transnational meeting was held in Bilbao on 15 March at Prospektiker. The partners kicked off the second year with the design of the new products: LMI-Hub, Training Course and Guide. An exciting moment of collaboration.

### LMI Hub

We've just added Skills-OVATE data to our Labour Market Intelligence Hub! This means you can now access detailed insights on job roles and skills demanded by employers across 28 European countries. Our Hub is the ultimate resource for anyone looking to stay informed and make data-driven decisions in the job market.
